

From one true original to another, It's a family affair!

The real values in life are those created and found within families; authenticity, trust and the opportunity given to be creative and express yourself. These same values drive our company and they define our corporate culture.

We saw an opportunity to create a better floor. We chased a dream and created a whole new category along the way. As the innovators of COREtec®, the Original, 100% waterproof floor, we did just that. Stylish, strong floors that sustain real family lives full of entertaining, kids and pets.

"Click, lock, enjoy. It is as simple as that!"

It all began as an entrepreneurial business in 2001, within our founder's heart and spare bedroom as our "headquarters". With the invention of COREtec®, the original, patented, 100% waterproof floor in 2013, we grew rapidly to become the leading brand of these unique and highly innovative products. We launched our European division in 2016 and that same year were acquired and embraced into the family of Shaw Floors, an industry leader and subsidiary of Berkshire Hathaway, led by the world-renowned investor, Warren Buffett.

We've come a long way from where we started to where we are now. But those family values guide us still. Led by management and embraced by every employee, dealer, and partner, we are recognized as the problem-solvers, innovators and design enthusiasts. Today we offer an incredible range of resilient, durable floors that can be purchased, installed and lived upon in one single day. Click, lock, enjoy. It is as simple as that!

The most difficult task will be to choose from our wide variety of life-like decors. But don't worry, you are sure to find one to match your style because we have a floor for every personality.

**Welcome to our family,
We promise to remain authentic to the core**

What's in your *core*?

Your COREtec® floor Always fits your style.

Stands up to real life, it's engineered for simplicity.

Always fits your style

We have a passion for providing a wide selection of authentic natural looks, so you can express what makes you, you. Persistent in product innovation – including micro-beveled edges, enhanced painted bevels & Embossed in Register technology – we create the most appealing designs & textures available.

Stands up to real life

Our floors are 100% waterproof, kid proof & pet proof. Try them in your kitchen or bathroom: they won't warp or buckle, even if submerged in water.

Our 100% waterproof core, resilient vinyl and protective wear layer will keep your floor looking good for the life of your home. So naturally, all COREtec® floors come with a limited lifetime residential warranty.

Is engineered for simplicity

COREtec® is easy to install, to care for and to live with. Its secure angle tap system doesn't require any glue or nails and can be installed over existing floors without additional underlayment.

Forget about sanding, polishing, sealing or refinishing: our floors are maintenance-free.

There's a million reasons to choose COREtec®, but here's our top 6.

Our floors:

- ✓ Are extremely stable
- ✓ Reduce noise
- ✓ Have superior scratch & stain resistance
- ✓ Do not need to acclimate
- ✓ Are suitable for underfloor heating & cooling
- ✓ Install on any surface

Cork, the natural choice

All our floors have a unique attached cork underlayment.
Why? It's warmer, quieter and easily installs over existing hard surfaces, perfectly concealing imperfections in subfloors.

And: it's one of the most sustainable materials out there. Cork is harvested from the cork tree and can be re-harvested every decade without damaging the tree.

A natural solution that brings only benefits to your home or business:

-  added sound insulation
-  a comfortable and warmer floor
-  a natural protection against mold & mildew
-  no need for separate underlayment
-  absorbs subfloor imperfections

COREtec® Stone is a downright **gamechanger**.

COREtec® Stone is the latest addition to our range of rigid composite floors. COREtec® Stone will unquestionably revolutionize the flooring industry for many years to come. It brings you the best of both worlds: the strength plus look and feel of a ceramic tile combined with the comfort and ease of installation of a soft floor. COREtec® Stone comes with a collection named CERATOUGH, this collection is available in a large number of designer-curated tile and stone designs.

COREtec® Stone is built around a high-density core composed of mineral particles, void of PVC. Its longevity is assured by multiple high-performance layers giving it a scratch resistance equal or better to that of a ceramic tile but without the brittleness of the latter. Accidental breakage during installation is excluded, which is a recurring problem with genuine ceramics.

Laying a COREtec® Stone floor is easy and straightforward and thereby offers new and unheard-of opportunities for the renovation market. It can be laid directly on top of an older floor or a slightly uneven surface without print-through.

Thanks to its secure tap angle system COREtec® Stone is self-aligning and does not necessarily need the intervention of a costly and hard to get hold of professional tiler. COREtec® Stone is 100% water-proof and its slim, tight seams add to its natural and hyperrealistic look. In commercial applications, COREtec® Stone drastically reduces costly downtime ensuring same-day walk-on.

**Touch the future
of flooring**

Advanced CERAGUARD® technology

CERAGuard® is a protective stain-, scratch- and scuff resistant thermal resin top layer specifically developed for the COREtec® Stone collection. The matte, embossed finish gives COREtec® Stone its stunning true-to-nature look and feel and makes it virtually impossible to distinguish from a genuine stone or ceramic floor.

Even an eagle can't spot the difference

Well suited for the project and renovation market

Aside from its residential use, COREtec® Stone also offers many advantages for the project and renovation market. There's no need to equalize or even prepare the surface. COREtec® Stone adapts to moderate irregularities without print-through and can be installed on top of an existing floor. Handling is easy thanks to its lightweight structure (about half the weight of a ceramic tile). Installation is done by clicking, not gluing. The whole installation process is rapid and straightforward allowing for same-day walk-on, thus avoiding costly downtime.

Enhanced dimensional stability

General and dimensional stability of the COREtec® Stone floor is firmly ensured by 2 strong layers of vinyl applied to both sides of the mineral core. As a result, a COREtec® Stone floor will never bulge nor contract and always keep its original appearance. The inherent COREtec® Stone resistance and stability is also very welcome when flooring densely visited offices and public- or commercial spaces.

COREtec® Stone in a nutshell.

Reduces costly downtime, same-day walk-on

Half the weight of a ceramic tile

The look and feel of a genuine ceramic tile

Protective stain-, Scratch- & scuff resistant thermal resin top layer

Requiring minimal cleaning and maintenance

Sustainable through the mineral core, void of PVC and its cork underlayer
